

BIOGRAPHY

Keith L. Woodman,
System Analyst
NASA Langley Research Center

Mr. Woodman has been with NASA Langley Research Center (LaRC) for 16 years, progressing from electronics technician, to hardware design engineer, to systems engineer. He has spent the majority of his career developing electronic systems or conducting systems analysis for a variety of aeronautic and space flight projects. Currently, Mr. Woodman is working as a systems analyst for NASA's Project Constellation conducting the development of organization models which were used as the starting point for forming the project's Integrated Discipline Teams (IDTs). He is a graduate of the LaRC Apprentice program, holds a B.S. in Applied Physics from Christopher Newport University, and a Masters of Engineering Management from George Washington University.
